## SUMMARY OF MONITORING VISIT

On-Site Monitoring Visit 7 was conducted at Highlands Oncology Group (SITE-055) on 08-Apr-2025 to review study progress, data quality, and regulatory compliance for Protocol M14-359. The monitor arrived at the site at 09:00 and met with the Study Coordinator (SC), Sarah Jenkins, and Sub-Investigator (Sub-I), Dr. Emily Chen. The Principal Investigator (PI), Dr. Alistair Thorne, was not present at the site and was unavailable for the exit interview or ad-hoc questions. This marks the second consecutive monitoring visit (following Remote Visit 6 on 09-Feb-2025) where the PI has been unavailable to meet with the CRA. Site staff indicated Dr. Thorne is currently prioritizing other competing clinical commitments.

The primary focus of this visit was to address the stalling enrollment rates, review the Investigator Site File (ISF), and perform Source Document Verification (SDV) for query resolution on completed subjects. No new subjects have been screened or consented since the previous visit. The site remains at 5 randomized subjects against a target of 28, with activation having occurred nearly a year ago. During the discussion regarding recruitment, Sub-I Dr. Chen expressed frustration, noting that while she is managing the active patient load, she lacks the referral network access required to identify new eligible NSCLC patients, which is typically managed by Dr. Thorne.

Data quality for the 5 completed subjects remains high, with minimal queries generated. Regulatory binders are largely up to date, though the Delegation of Authority log required a minor update regarding the Sub-I's expanded scope during the PI's absence. The visit concluded with an exit interview with SC Sarah Jenkins and Sub-I Dr. Chen. The critical issue of PI oversight and the lack of new enrollment was discussed, and the site was informed that this would be escalated to the Sponsor.

### Overall Impression:

While data quality and retention of completed subjects are excellent, the site is critically failing to meet enrollment targets due to a lack of Principal Investigator engagement and referral pipeline activity.

### Exit Interview Comments:

Discussed the urgent need for PI re-engagement. Dr. Chen acknowledged the recruitment stall but stated she cannot force referrals from the PI's network. SC Jenkins confirmed no new potential subjects are currently in prescreening.

## URGENT ISSUES

### Yes

A. Principal Investigator (Dr. Thorne) unavailable for second consecutive visit; lack of oversight is directly impacting recruitment pipeline.

B. Enrollment has stalled completely (0 ongoing, 0 screened since last visit). Site is significantly behind the target of 28 subjects.

## MONITORING VISIT REPORT

### PERSONS PRESENT

| Name           | Position/Title    |
|----------------|-------------------|
| Dr. Emily Chen | Sub-Investigator  |
| Sarah Jenkins  | Study Coordinator |

### ENROLLMENT STATUS

|                            |   |
|----------------------------|---|
| Screened:                  | 6 |
| Consented:                 | 5 |
| Pre Randomization Failure: | 1 |
| Randomized:                | 5 |
| Completed:                 | 5 |
| Ongoing:                   | 0 |
| Withdrawn:                 | 0 |

#### Recruitment Plan Notes:

Recruitment rate has fallen below target (0.45 subjects/month vs target 2.0). Sub-I expressed concern about PI engagement and its impact on the recruitment pipeline. The site has exhausted their internal database and relies on PI referrals which have ceased.

**Recruitment Rate Adequate?** No

## MONITORING CHECKLIST

### Informed Consent

|   |                                                        |     |                                                               |
|---|--------------------------------------------------------|-----|---------------------------------------------------------------|
| 1 | Is the current IRB/EC-approved ICF version being used? | Yes | Version 3.0 is current.                                       |
| 2 | Was ICF signed prior to any study procedures?          | Yes |                                                               |
| 3 | Was the correct version of the ICF signed?             | Yes |                                                               |
| 4 | Is re-consent required for any subjects?               | N/A | No protocol amendments requiring re-consent since last visit. |

### Site Staff/Facilities

|    |                                                                    |     |                                                           |
|----|--------------------------------------------------------------------|-----|-----------------------------------------------------------|
| 5  | Is the Principal Investigator available and involved in the study? | No  | Escalate PI availability concerns to sponsor.             |
| 6  | Are Sub-Investigators qualified and delegated appropriately?       | Yes | Dr. Chen is managing all study activities.                |
| 7  | Is the Study Coordinator trained and familiar with the protocol?   | Yes | SC Jenkins is well versed in the protocol.                |
| 8  | Are pharmacy facilities adequate and secure?                       | Yes |                                                           |
| 9  | Are laboratory facilities certified and adequate?                  | Yes | CAP/CLIA current.                                         |
| 10 | Is equipment calibrated and maintained?                            | Yes |                                                           |
| 11 | Is the Delegation of Authority Log current?                        | No  | SC to update DOA log to reflect current responsibilities. |
| 12 | Is the Training Log complete for all staff?                        | Yes |                                                           |
| 13 | Are CVs and medical licenses current?                              | Yes |                                                           |

### Investigator Site File / Monitoring Activities

|    |                                                             |     |                               |
|----|-------------------------------------------------------------|-----|-------------------------------|
| 14 | Is the Investigator Site File (ISF) complete and organized? | Yes |                               |
| 15 | Are all essential documents current and filed?              | Yes |                               |
| 16 | Is the Site Visit Log signed by the monitor and staff?      | Yes |                               |
| 17 | Have action items from prior visits been resolved?          | Yes | No open actions from Visit 6. |

### Research Ethics Board

|    |                                                            |     |                                      |
|----|------------------------------------------------------------|-----|--------------------------------------|
| 18 | Is IRB/EC approval current for protocol and ICF?           | Yes | Annual renewal approved 15-Jan-2025. |
| 19 | Have all protocol amendments been approved?                | Yes |                                      |
| 20 | Have safety reports been submitted to the IRB/EC?          | Yes |                                      |
| 21 | Is the annual renewal current?                             | Yes |                                      |
| 22 | Is site-specific consent wording approved?                 | Yes |                                      |
| 23 | Is SAE reporting to IRB compliant with local requirements? | Yes |                                      |

### Safety

|    |                                                          |     |                              |
|----|----------------------------------------------------------|-----|------------------------------|
| 24 | Are Adverse Events (AEs) reported in a timely manner?    | Yes | No new AEs since last visit. |
| 25 | Are SAEs followed to resolution?                         | Yes | All prior SAEs resolved.     |
| 26 | Is pregnancy reporting compliant?                        | N/A | No pregnancies reported.     |
| 27 | Are protocol deviations documented?                      | Yes |                              |
| 28 | Is the safety database reconciled with source documents? | Yes |                              |
| 29 | Are SUSAR notifications acknowledged and filed?          | Yes |                              |
| 30 | Have DSMB recommendations been implemented?              | N/A |                              |
| 31 | Is the risk-benefit assessment current?                  | Yes |                              |

### Compliance

|    |                                    |     |                                  |
|----|------------------------------------|-----|----------------------------------|
| 32 | Is protocol compliance acceptable? | No  | Site to revise recruitment plan. |
| 33 | Is GCP compliance maintained?      | Yes |                                  |
| 34 | Is regulatory compliance current?  | Yes |                                  |

### Study Investigational Product

|    |                                        |     |                                                  |
|----|----------------------------------------|-----|--------------------------------------------------|
| 35 | Is IP storage adequate and secure?     | Yes | Ambient storage 15-25C maintained.               |
| 36 | Is IP accountability current?          | Yes | 100% accountability performed for returned kits. |
| 37 | Is IP dispensing correct per protocol? | Yes |                                                  |
| 38 | Are IP returns documented?             | Yes |                                                  |
| 39 | Is temperature monitoring compliant?   | Yes | Temp logs reviewed; no excursions.               |

## CRA ASSESSMENT

Site 055 demonstrates strong data management capabilities for the subjects currently enrolled and completed. The Study Coordinator and Sub-Investigator are diligent in maintaining regulatory compliance and data integrity. However, the site's performance is critically threatened by the continued disengagement of the Principal Investigator, Dr. Thorne. This is the second consecutive visit where the PI was unavailable. The lack of PI oversight is directly correlating with the complete stall in recruitment (0 screened since last visit). The Sub-Investigator is capable of clinical management but lacks the authority and network to drive recruitment. Immediate Sponsor intervention or a PI-to-Medical Monitor call is recommended to address the enrollment stagnation.
